

# PACKAGING

Eggs are a unique product which requires unique packaging. Marcato line of egg packaging offers optimum protection and presentation. We offer a flexible choice of the number of eggs and convenient service for companies with both automatic and manual egg packaging process.

## LABEL

For Marcato a label is not limited to the legally required product information. Well-designed, it will help promote your company and attract the customer to choose your product. Our team will help design the most effective label and attach it automatically onto the packaging.

## DESIGN

Fitted, safe and solid construction of the packaging takes accounts of the size, number and fragility of the product.

## SECURE CLOSING

Tested for the optimum opening and closing strength, the packaging guarantees both the safety of the packing process and optimum comfort of use for the end customer.
